中关村智造大街产业生态 Industrial Ecosystem of I

1 硬件呈现 Hardware Production

2 解决方案 Solution

3 标准与检测 Standard & Testing

4 创新服务 novation Service

中关村智造大街 公共服务中心 I-M-WAY Public Service Center

中关村智造大街，位于北京市海淀区五道口清华大学东南门，是北京市政府、市委办局及中关村管委会支持下，海淀区重点打造的围绕智能制造产业生态的中试基地，现已成为推动“国家双创基地”的创新高地。为充分发挥全国科技创新的重要源头和新兴产业策源地作用，在中关村先行先试政策支持下，中关村智造大街是北京市科技创新中心又一创新性尝试，同时也是中关村加速促进双创的有机结合体。

中关村智造大街公共服务中心，是依托“心·云·端”即一个中心、云服务平台、端对接，并通过机器人、PC、手机、人工、视频直播专家等多入口方式，实现“互联网+智能服务”的一站式专业精准服务平台。

中心提供特种加工实验室、快制中心实验室、工业设计模型制作实验室、职能测试实验室、虚拟制造实验室、工业大数据分析实验室、机械原理与设计实验室、这七个专业实验室及快制检测、资源认证、标准制定、知识产权快维等百余项专业服务，完善科技服务平台快速、精准、便捷的服务，加速国家科技创新中心建设。

I-MWAY is located at the hinterland of Wudaokou, which is near the south gate of Tsinghua University. Supported by Beijing Municipal Office, other relevant bureaus, commissions, and the Zhongguancun Administration Committee, I-MWAY serves as a crucial accelerator of intelligent manufacturing industry in Haidian District. Along with the strategies of "Entrepreneurship and innovation" by China government, it is now playing as an important role of both national science and technology innovation. Meanwhile, I-MWAY is also an important center to progress the services of "entrepreneurship and innovation" into a high-end level, and to support the idea of innovation entrepreneur as well as industrial upgrade.

Stick to the concept of "Center-Cloud-End", which means one Center one Cloud Services Platform, and End to END service, Zhongguancun Public Service Center--I-M-WAY offers one-stop, professional, accurate service. Through robots, PCs, Mobile phones, video chats with experts and many other entry ways, it aims to achieve the idea of "Internet+ Intelligent Services".

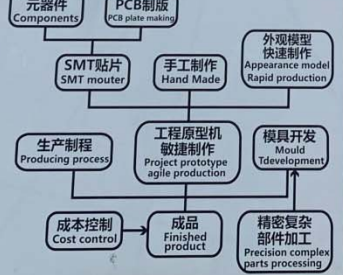

Zhongguancun Public Service Center provides seven professional laboratories, including non-traditional machining laboratory, rapid manufacturing laboratory, industrial design model manufacturing laboratory, intelligent test laboratory, virtual manufacturing and simulation laboratory, industrial big data analysis laboratory, and mechanical principle and design laboratory. On the other hand, this center supplies more than one hundred service such as rapid manufacturing detection, quality certification, standard establishment, fast maintenance of intelligent property and so on. Meanwhile, public center perfects rapid, accurate and convenient service of technology service platform, to innovate the construction of national technology.

3D打印 3D Printing

高精度多功能贴片机 High precision multi-function patch machine

产品创意 工业设计 Product Innovation Industry

快制中心智能加工实验室拥有进口工业级3D打印机、5轴数控加工等国际先进设备，可为智能硬件产品的研发提供优质的外观模型、精密结构件和工程原型机的快速制作服务。

Intelligent Processing Laboratory of Rapid Manufacture Center has imported industrial grade 3D printers, 5-axis CNC machining and other international advanced equipment. It provides high-quality appearance models for the development of intelligent hardware products, and rapid manufacturing service for precision structural parts and engineering prototypes.

技术研发 方案设计 Technology Research Development Solution Design

本中心的敏捷制造研发团队针对智能硬件、汽车电子、工业智能控制、医疗仪器、消费电子等领域，提供原理设计、电子元器件、物料控制、PCB布局、电子线路设计、产品ODM、OEM及平台选型等协同设计服务，帮助创业初期或转型期的团队甄别所缺乏的能力单元，并提供全方位的协同辅助。

Our Agile Manufacturing R & D Team provides principles design, electronic components, material control, PCB layout, electronic circuit design, products ODM, OEM and platform selection and other collaborative design services for smart hardware, automotive electronics, industrial intelligent control, medical equipment, consumer electronics and other fields. We help start-ups or transition teams identify their gaps in capability and provide all-round collaborative assistance.
