Motivation

+ K, S, A

The aims of Citizenship and Social Development are to help students:

- (a) enhance understanding of society, the country, the human world, the physical environment and related knowledge;
- (b) develop **multiple perspectives** on contemporary mature topics in different contexts (e.g. cultural, social, economic, political and technological contexts);
- (c) become independent thinkers; be able to adapt to the ever-changing personal, social, national and global circumstances and construct knowledge; understand the complexities of the topics, and the challenges and processes involved in decision-making for making law-abiding, rational and affective analysis, and learning how to handle conflicting values;
- (d) inherit Chinese culture and heritage in a pluralistic society, deepen understanding and sense of identity of individuals with Chinese nationality and Chinese citizenship, and at the same time appreciate, respect and embrace diversity in cultures and views;
- (e) develop skills relevant to **life-long learning** and strengthen their ability to integrate and apply knowledge and **skills, including critical thinking skills, creativity, problem solving skills, communication skills, collaboration skills, data management skills, self-management skills, self-learning skills, and information technology skills;**
- (f) develop positive values and attitudes towards life, so that they can become informed and responsible citizens of society, the country and the world.

Secondary Education Curriculum Guide (2017)

Introduction	PDF
Booklet 1: Ongoing Renewal of the School Curriculum	PDF
Booklet 2: Learning Goals, School Curriculum Framework and Planning	PDF
Booklet 3: Effective Learning and Teaching: Developing Lifelong and Self-directed Learners	PDF

- Since 2001, the Learning to Learn curriculum reform has been implemented to promote a student-centred approach and curriculum and pedagogical changes that foster students' **active learning, engagement and ownership**, which are conducive to whole-person development and **learning to learn capabilities** to achieve lifelong learning. This is complemented by the building of communities of practice among teachers and the engagement and support of different school stakeholders... It is envisioned that our school curriculum will continue to focus on learning and to improve the quality and effectiveness of learning, and the curriculum will remain student-centred and continue to provide students with multifarious learning experiences and equip them to be **lifelong and self-directed learners**. P.2

HOW?

- the public assessment results of this subject will be reported as "Attained" and "Unattained"
- Teachers should help students develop the skills and habits of self-directed learning so as to help them become lifelong learners. C&A p.47
- "SDL is only achievable when students possess a sense of self-awareness of their own beliefs, strengths, abilities, strategies adopted, and accept responsibility for their learning. In this regard, students should be provided with an encouraging environment for their own learning and become self-directed learners. Ample time and authentic contexts to actively and confidently make connection with existing knowledge and apply them in real life contexts, to co-construct knowledge with peers, and most importantly, to be responsible." p.5 Booklet 3.

- What is CS?
 - ▣ Our society, our country and our world
 - ▣ Skills: e.g. thinking skills (verbal and numerical reasoning, etc)
 - ▣ Our role as citizens – members connected to one another
- How is CS relevant to you?
 - ▣ Need it for exam
 - ▣ **Need it for personal development: literacy and effective expression**
 - ▣ **Need it for personal development: a positive and constructive attitude**

To Show that the content, skills and attitude are relevant to their growth and development

LEARNING MOTIVATION: RELEVANCE

The signing of the Convention of Peking and its background

In 1856, the British and French Allied Forces launched the Second Opium War.

In October 1860, the Allied Forces captured Beijing and burned the Old Summer Palace.

On 24 October 1860, Britain forced the Qing government to sign the Convention of Beijing, in which the southern part of the Kowloon Peninsula, i.e. south of Boundary Street (including Ngong Shuen Chau or Stonecutters Island), was occupied by Britain.

1856-60 The Second Opium War

What is Rule of Law?

While **justice** creates the foundation and standard for the rule of law, it is the achievement of **the rule of law** that delivers the social order through which we can develop the ideals of **freedom, democracy and equality**.

Three Principles of the Rule of Law

In the 19th century, Professor A.V. Dicey proposed that **the rule of law** should include three important principles:

1. Supremacy of Law

Everyone should be and only be ruled by law.

CHINA DAILY HK EDITION

Diversified activities to promote rule of law among youth

By Teresa Cheng [Yeuk-wah](#)

The Department of Justice (DoJ) is always committed to upholding the rule of law. Last year, we launched the “Vision 2030 for Rule of Law” initiative to promote the proper understanding of the rule of law in the community especially among the youth. In the coming new school year, the DoJ will continue to introduce diversified activities for primary and secondary students to advance their understanding and practice of the rule of law.

In February this year, the DoJ, through touring drama performances for all city-wide primary schools, conveys the basic concepts of the rule of law and cultivates law-abiding awareness in a lively and interesting way to students. As to secondary students, the DoJ supports the launch of the “Pilot Scheme on Rule of Law Education for Secondary School Students” by the Hong Kong Policy Research Institute (HKPRI) in the 2020/21 academic year. Lawyers were invited to serve as facilitators while law students and graduates as ambassadors. Secondary students are able to grasp the proper core concepts of the rule of law after taking part in seminars, interactive games and group discussions.

The DoJ also assists the preparation of teaching materials on the rule of law. For instance, the Basic Law Foundation’s “e-Resources for Rule of Law and the Basic Law”, which was supported by the DoJ, provides a series of teaching materials on the Constitution, the Basic Law and the rule of law for teachers of secondary schools. At the same time, the DoJ is in support of the training course “Respecting the Law, Reinforcing the Rule of Law” co-organized by the Endeavour

Education Centre and the Education Bureau for teachers from both primary and secondary schools. The course covers topics including the Constitution, the Basic Law, national security, Hong Kong’s legal system and the rule of law, etc., with a view to fostering the promotion of the rule of law education.

In the new school year, the DoJ will not only continue the above programs, but also stand ready to introduce the “Rule of Law Enlightenment” Programme to further promote the rule of law in a more interesting way with enriched contents. To name a few:

- School talks: students can raise questions at the talk to enhance interaction;
- Prosecution Week: Quiz and visit to courts will be arranged for students;
- Rule of Law Journey: students can learn more of the legal development through visits to the Hong Kong Legal Hub.

To highlight the importance of abiding by the law and the application of law in our daily life, the DoJ will organize a law quiz competition for primary students. A video competition will be held in which secondary students are encouraged to share their thoughts on the rule of law.

If you are interested in any of our programs, please don’t hesitate to read the latest booklet on “Vision 2030 for Rule of Law”.

The rule of law is the cornerstone of Hong Kong’s success. Everyone in society shoulders the responsibility to promote the proper concept of the rule of law. I would like to thank the HKPRI, the Basic Law Foundation and the Endeavour Education Centre for joining hands with the DoJ in supporting the rule of law education. The DoJ will actively strengthen the rule of law education so as to further enhance the proper understanding and practice of the rule of law amongst youth.

The writer is Hong Kong’s Secretary for Justice. The article appeared on her official blog page on Sept 4, 2021.

LEARNING MOTIVATION: CONFIDENCE

Reminders

(c) Describe the trend in China's transport network development as shown in Source A. (4 marks)

Reminders:

- Ms. Chan: a more comprehensive analysis of the data should also include a description of details:
 - e.g. see the different pace of development of road and train (by comparing the growth rate)

e.g. answer the question Directly with the question words (transport network development) AND explaining that transport network, according to the data, includes road and railway development.

There is a **growing trend** in China's transport construction. In terms of total **road mileage**, according to Source A, the total road mileage in China was 4,695,200 km in 2016. It was increased to 5,198,100 km in 2020, with an increase of 502,900 km or 10.7%.

In terms of total **railway mileage**, the total railway mileage in China was 124,000 km in 2016. It was increased to 146,000 km in 2020, with an increase of 22,000 km or 17.7%. Both the total road and railway mileage in China continue to increase, indicating a trend of increasing transport construction in the country.

(d) With reference to Sources B and C, how can poverty in China be combated with the development of transport infrastructures? Explain your answer. (6 marks)

Reminders:

- Ms. Chan:
 - **YOUR IDEAS and REASONING!** too many students base their answers on copying the source content. Yet, the source is only providing the

background information or some hints to stimulate your reasoning. What we need are your **organized ideas** and **detailed reasoning to answer the question**.

- jumping reasoning:
 - more educational opportunities... so... eradicated poverty. [HOW? need the REASONING]
- to enrich your reasoning: give a FULLER picture of the situation (e.g. improvement: describe briefly about the past before explaining the improvement)
- add your own knowledge if possible and relevant to strengthen your arguments (esp. 'with reference to' vs. 'based on/ according to')
- the importance of topic sentences and CONCLUDING sentences (to check if your argument is a REAL argument - plan (and check) before you write).
- PLAN your FLOW of ideas (and organize) before you write.
- it's always good if you can give REAL examples to support your arguments - examples come from your readings and understanding of the situations - in a grounded manner → make arguments no only theories but ideas supported by REAL and grounded examples.

Firstly, the development of transport construction can facilitate the **movement of people**. The development of transport construction can increase transport capacity, shorten the distance between rural and urban areas, allow people to travel smoothly and help more students to go to school in poor areas. According to **source B**, as suggested by the train conductor, the railway has connected people in the mountain area to the outside world, so more students can take the train to go to school in nearby counties. Increased access to education can contribute to reducing poverty. Students gain knowledge and acquire basic skills such as reading, writing and numeracy at school. They can then use these skills to earn higher incomes and build successful lives. They can also bring economic income to the impoverished areas. The gap between urban and rural education is gradually narrowing. By 2020, a total of 525,000 students from rural and poverty-stricken areas have enrolled in

spacecraft-OS-1786foswQvK%3Fpage=detail%26display=page%26type=video

China released SpaceOS III, a new-generation operating system for spacecraft. /CFP

China has released **SpaceOS III**, a new-generation operating system for spacecraft.

Developed by the Beijing Institute of Control Engineering under China Academy of Space Technology, the operating system has independent intellectual property rights. Earlier versions of SpaceOS have been used in more than 300 spacecraft.

According to SpaceOS developers, the system **boasts outstanding reliability and security**. It can meet the different requirements of crewed spaceflight, satellite communication, deep space exploration, and satellite constellation.

The Beijing Institute of Control Engineering began developing SpaceOS in the **1970s**. Its first application was in **2006** in a satellite of the Dongfanghong-4 communication satellite platform. In **2013**, SpaceOS II was used in the Chang'e-3 lunar probe.
